An Overview

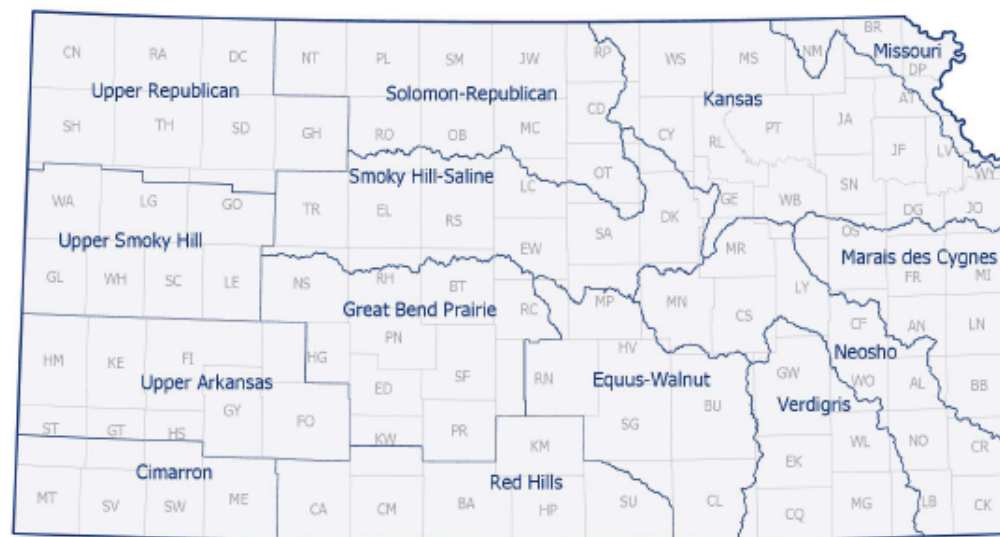

ON RAC'S ROLE FOR STATE WATER PLANNING

Regional Advisory Committees (RAC)

Fourteen regional planning areas were established in December 2014 by the Kansas Water Authority in conjunction with the Long-Term Vision for the Future of Water Supply in Kansas. Regional Advisory Committee members were approved for these 14 planning areas and began to establish goals and action plans for their regions. In September - October 2016 all regional goal action plans were presented to the Kansas Water Authority and approved.

Core Categories:

- Agriculture
- At-Large/Public
- Conservation / Environment
- Industry / Commerce
- Public Water Supply

The main RAC functions are to advise the KWO and KWA in:

- identifying water-related issues within their region
- the formulation of revisions to their corresponding regional section of the Kansas Water Plan (KWP)
- KWP implementation priorities and actions
- issues under consideration for inclusion in the KWP

The RACs are the eyes and ears of the KWA and KWO around the state, and the ambassadors and solicitors of public input. Members are messengers of the KWP and RAC actions to ensure future water supply needs are met, while also communicating information on concerns and issues to citizens. They advise, guide, and sometimes lead through action on implementation of goals.

Region-Specific Categories:

- WRAPS
- Planning & Zoning
- Irrigation
- GMD
- Water Assurance District
- Ranching / Grazing
- Fish & Wildlife
- Public Utility
